Experience

MountBlue Technologies (Assigned to Skor Technology)

May. 2025 – Present

Software Engineer – Backend Team

Bangalore, IN

- Owned the end-to-end development lifecycle of backend features for the **SkorCard** digital credit card platform, including requirement analysis, system design, implementation, testing, deployment, and production monitoring.
- Architected and developed scalable microservices and REST APIs, improving transaction processing performance by 35% and supporting 50,000+ active users.
- Designed and delivered core business modules including **Rewards, Referrals, EMI, Promo Campaigns, Notification Systems, and Credit Card Delivery Tracking**, implementing rule-based workflows that increased new customer acquisition by 25%.
- Integrated multiple **Banking APIs** and third-party services for credit card issuance, transaction validation, customer notifications, and real-time delivery tracking, while driving **80–90% fewer customer-reported issues** through API optimizations, automated testing, bug fixes, proactive monitoring, and rapid production incident resolution.

MountBlue Technologies

Feb. 2025 – May. 2025

Software Engineer Intern

Bangalore, IN

- Developed a Trello-inspired task management platform using **React, Node.js, Express.js, and MongoDB**, enabling board, list, and card-based workflow organization.
- Engineered secure **REST APIs** and drag-and-drop state management for authentication, task operations, and real-time workflow updates.

Projects

DevTunnel Ecosystem (Go & Node.js Open-Source Libraries) | *Golang, Node.js, TCP, WebSocket, HTTP Proxy* 2026

- Architected and published cross-language open-source tunneling libraries (**Node.js & Go**), achieving **1.4K+ combined package installs across NPM and Go ecosystems** and enabling developers to expose local applications securely over the internet through a **single-line integration**.
- Engineered a developer observability suite with **traffic inspection, request replay, interception, and audit history**, cutting API troubleshooting time by **90%** and enhancing debugging efficiency at scale.

All in1 URL | *MERN Stack, Redux, REST APIs, Docker, AWS (EC2, S3, CloudFront CDN)*

Oct 2024

- Architected a scalable multi-tenant SaaS URL management platform serving **2K+ visitors**, supporting **custom aliases, free user-specific subdomains, dynamic routing, and centralized redirect management**.
- Implemented enterprise-grade access control with **Public, Unlisted, and Private** link visibility, **granular profile privacy settings** and **user-configurable email notifications for link visits**, enhancing security, privacy, and user engagement monitoring.
- Designed and optimized a clickstream analytics engine using **MongoDB Aggregation Framework**, enabling real-time tracking of traffic sources, geolocation, device analytics, engagement metrics, historical trend analysis, and configurable visit-alert workflows through interactive dashboards.

Technical Skills

Languages: Golang, JavaScript, C++, Node.js

Frameworks: Gin, React.js, Express.js, RESTful API

Databases: Postgres, MongoDB, MySQL, Redis

Tools/Other: Docker, AWS (EC2), Kubernetes, RabbitMQ, ELK, Git, Linux, Data Structures & Algorithms

Patents

- **Sharp U-Turn Accident Safety System** (Patent Application No. 202411080886, Jan 2024) — Co-invented an IoT-based road safety system leveraging IR sensors, ultrasonic sensors, ESP8266 microcontroller, and real-time alert mechanisms to reduce collision risks at blind U-turns and low-visibility roads.

Achievements

- Secured 141st position out of 7,000 participants in GeeksforGeeks weekly challenge, placing within the top 2% and showcasing consistent problem-solving performance.
- Solved over 500+ LeetCode problems, averaging 40 challenges per month, which refined data-structure mastery and accelerated feature development cycles by 15%.

Education

Lovely Professional University (LPU)

Aug. 2022 – Aug. 2024

Master in Computer Application

Jalandhar, IN

Magadh University

Aug. 2017 – Dec. 2019

Bachelor in Computer Application

Patna, IN
